# About the Data

- Source: StockX (marketplace to sell and buy sneakers and other cool stuff), Kaggle
- Time frame: 2015 – 2019
- Only two brands/collaborators/design labels:
  - Yeezy (Kanye “Ye” West)
  - Off-White x Nike (Virgil Abloh)
- 50 different kinds of sneakers
- 99,956 sneakers sold in dataset

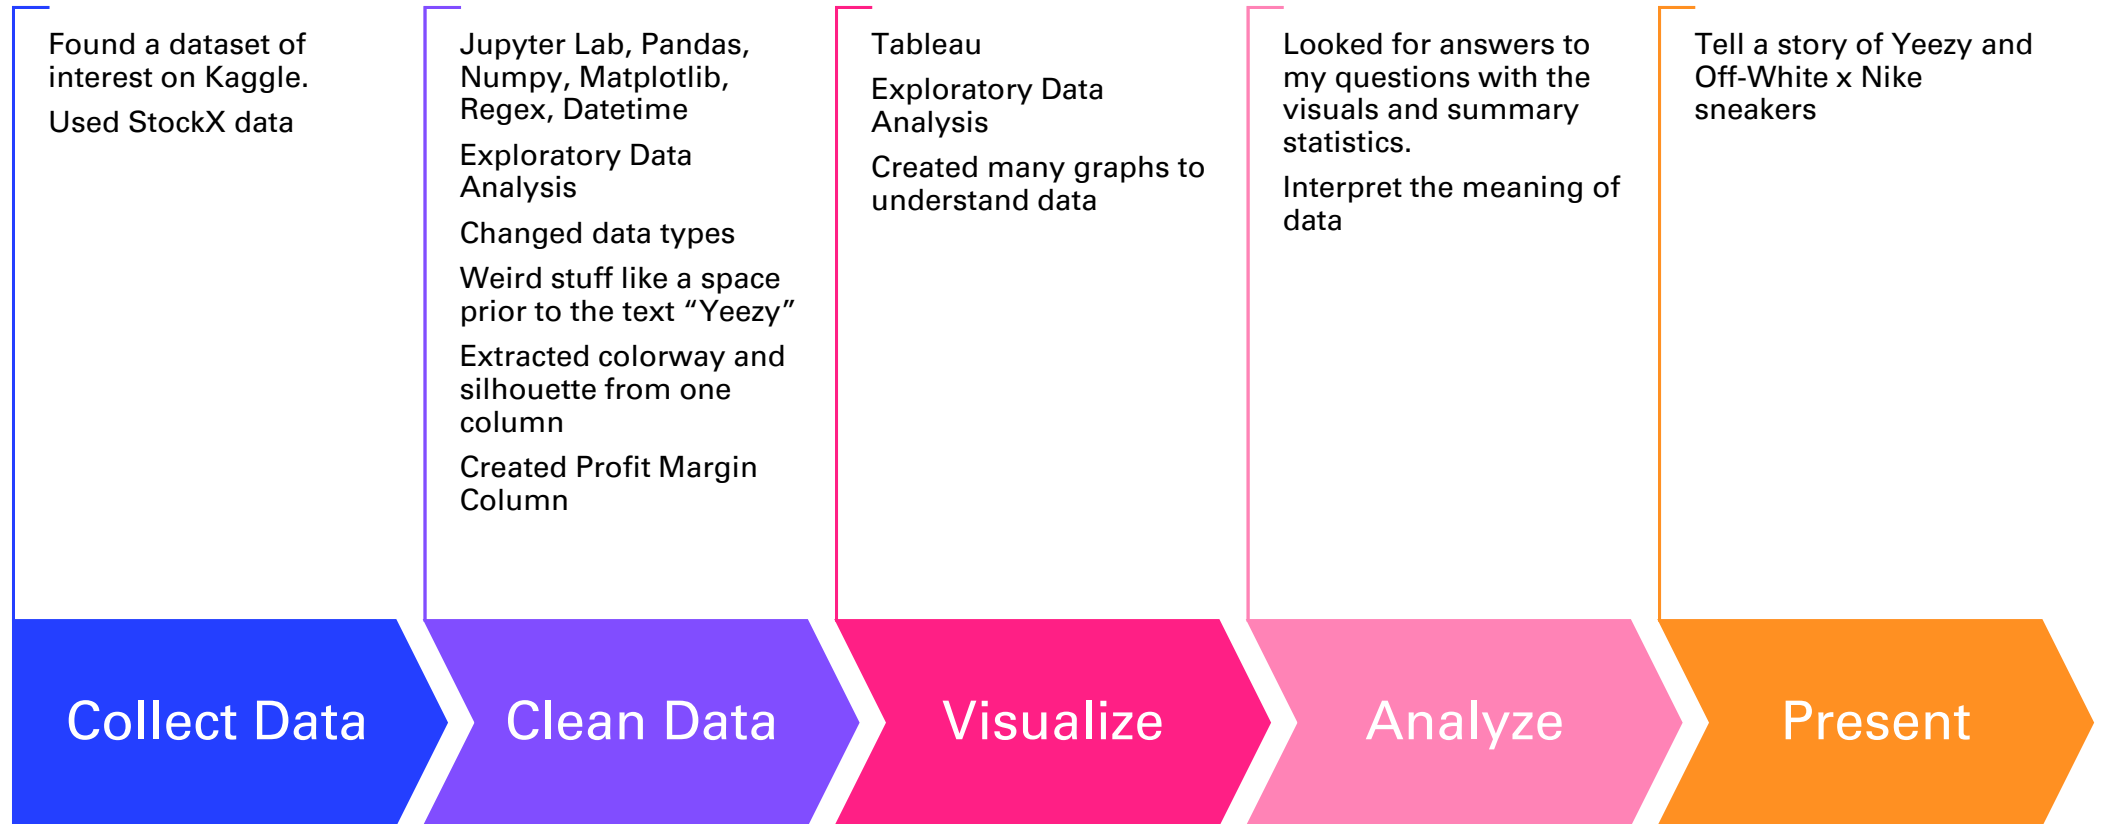

# MY QUESTIONS

Which sneaker is the most popular?

Which sneaker is most profitable on the secondary market?

Can I predict when the best time to resale a sneaker?

# Data Cycle

```
[30]: df.loc['Sneaker Name'].value_counts()
#value_counts() on the filter to see what all the Yeezys "Sneaker Names"

```

How many unique "Sneaker Names"

- 20 different colorways

```
[28]: ...
      f = df['Brand'] == 'Yeezy'
      df.loc[f]

      #not returning anything...
```

Used a lot of filters to do some exploration

```
[28]: '''
      filt = df['Brand'] == 'Yeezy'
      df.loc[filt]

      #not returning anything...
      '''
```

Space character in front of " Yeezy" so I couldn't filter

```
[28]: "\nfilt = df['Brand'] == 'Yeezy'\n\ndf.loc[filt]\n\n\nnot returning anything...\n"
```

```
[29]: filt = df['Brand'].str.contains('Yeezy')
      df.loc[filt]
      #turns out there is a space in front of " Yeezy", so using .str.contains('Yeezy')
```

	Order Date	Brand	Sneaker Name	Sale Price	Retail Price	Release Date
0	2017-09-01	Yeezy	Adidas-Yeezy-Boost-350-Low-V2-Beluga	1097	220	2016-09-24
1	2017-09-01	Yeezy	Adidas-Yeezy-Boost-350-V2-Core-Black-Copper	685	220	2016-11-23

Space character in front of " Yeezy" so I couldn't filter

```
[52]: offcolor_df = off_df['Sneaker Name'].str.extract('(.*)-?(?:-Off-White)-?(.*)')
      offcolor_df

      #removed the "-" with new regex
```

```

**WHICH SNEAKER IS  
MOST POPULAR?**

# Most Popular Sneakers: Yeezy 350 v2

## Number of Sneakers Sold by Silhouette & Brand

StockX | Yeezy & Off-White x Nike  
2015-2019

# Most Popular Sneakers: Yeezy 350 v2 Butter

Most Popular Sneaker Overall: **11,423 sold**  
(11.4% of all total sold)

# Yeezy 350 V2 Butter

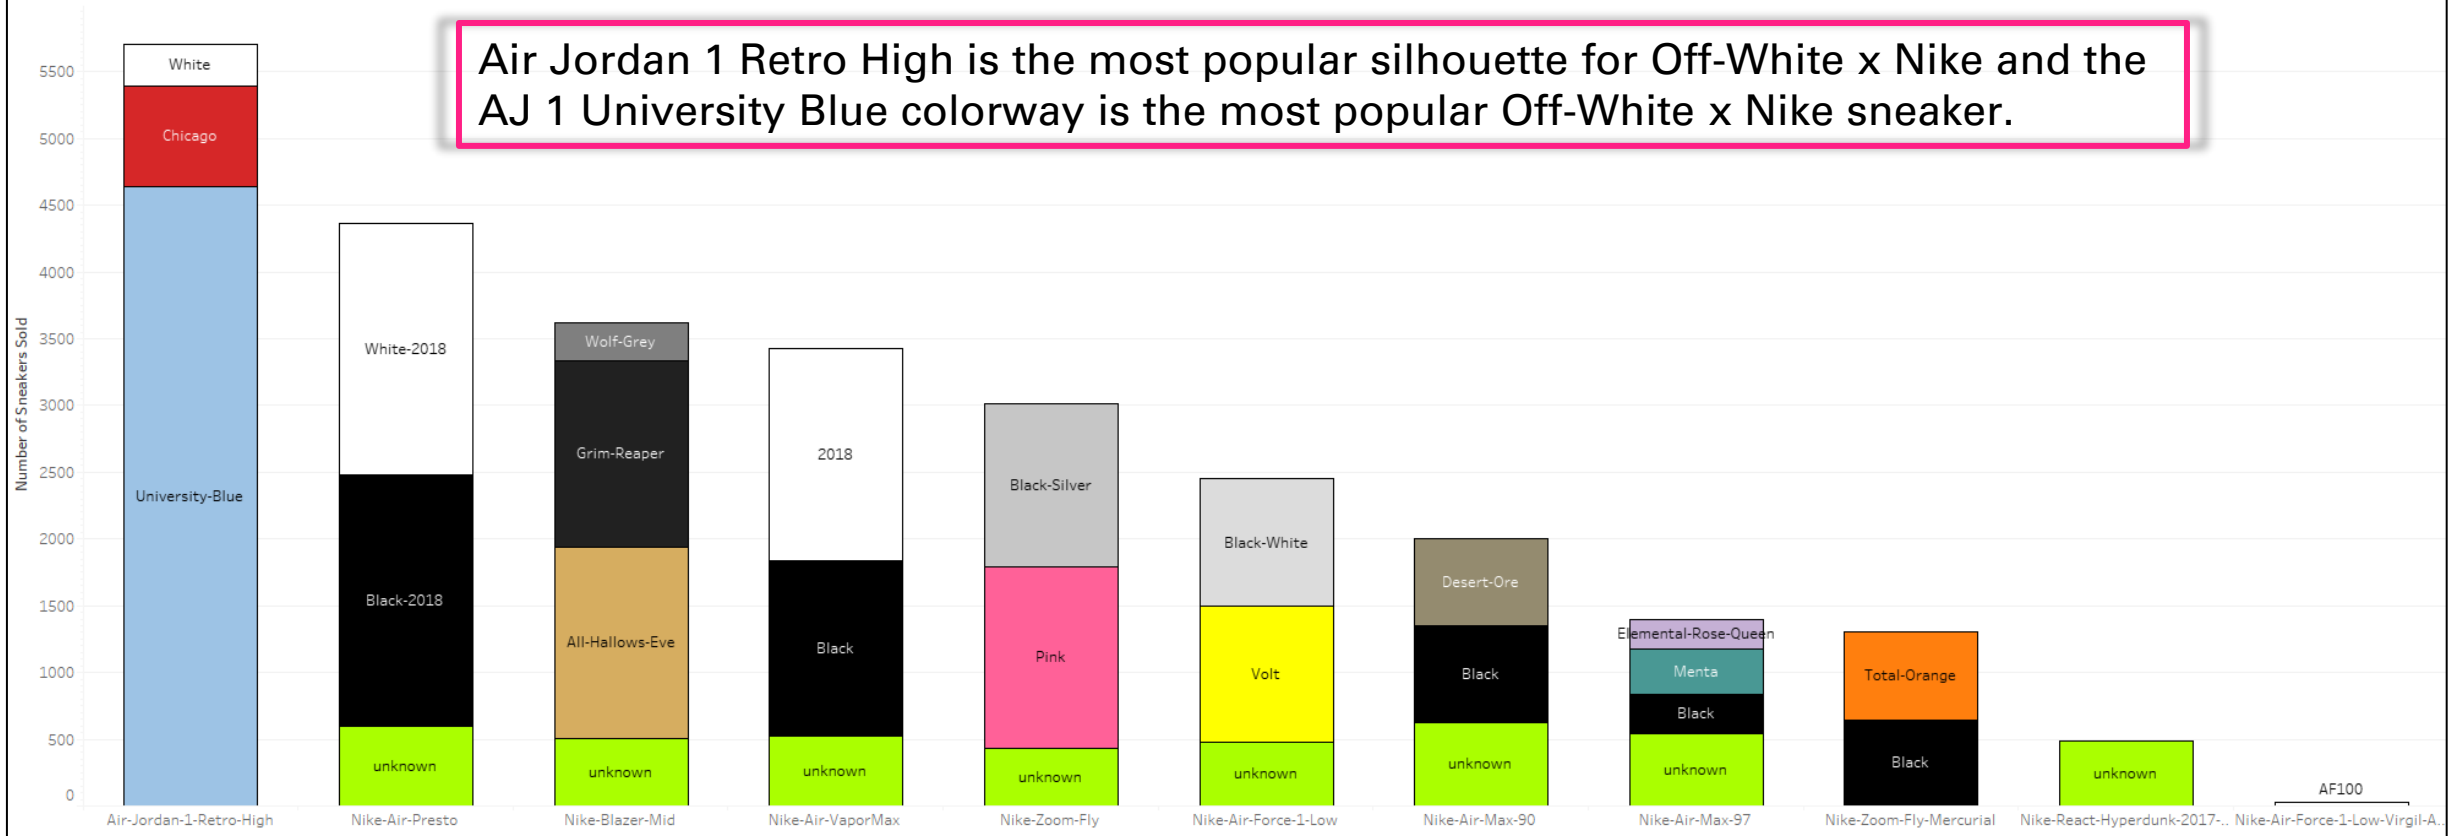

# Off-White

## Number of Sneakers Sold by Colorway for Off-White Silhouettes

StockX | Yeezy & Off-White x Nike  
2015-2019

Air Jordan 1 Retro High is the most popular silhouette for Off-White x Nike and the AJ 1 University Blue colorway is the most popular Off-White x Nike sneaker.

**WHICH SNEAKER IS  
MOST PROFITABLE?**

# Most Profitable Sneaker: Air Jordan 1 Retro High University Blue

Sneaker With Highest Total Profit Margin:  
**\$3,063,056**

**12.9%** of profit margin of all sneakers for only  
**4.6%** of sneakers sold

Off-White  
Air Jordan 1 Retro High  
University Blue

# Max Sale Price

## Single Sale Price Greater Than \$2,000 by Brand

StockX | Yeezy & Off-White x Nike  
2015-2019

Sneaker With Single Highest Resale Price:  
**\$4,050**

Retailed for \$190

Men's size 6 (Women's 7.5)

## Off-White Air Jordan 1 Retro High Chicago

# Most Profitable Silhouette: 350 v2

# BEST TIME TO RESELL SNEAKERS?

# NOTES

Couldn't quite answer this question all the way – need to learn somethings about machine learning first.

But here is what I do know...

# Time between release date and order date with sale price

- Two clear clusters
- Yeezys stayed on the market far longer than Off-White Nikes
- Cluster of Off-Whites that have a higher sale price than Yeezys

# Sneakers and Sale price

- The more sneakers for sale, the smaller the profit margin, especially for the Yeezys
- 4 possible outliers for Off-White x Nike
- Overall, there are less Off-White x Nike sneakers made, which makes them more exclusive, hence the high median profit.

# Sneakers and Sale price

## Number of Sneakers Sold by Sneaker Name vs. Median Sale Price

StockX | Yeezy & Off-White x Nike  
2015-2019

# STAKEHOLDERS

## SNEAKERS

### StockX

- Off-White x Nike generated 57.5% of total profit and only accounted for 27.8% of sneakers sold.
- Yeezy 350 v2 is most profitable silhouette over the four years.

### Enthusiasts

- Try to get a sneaker when it is released to pay less.
- 350 v2 are the most popular and widely available

### Collectors

- Air Jordan 1 Retro High Chicago is the GOAT. Collect that shoe.
- Also collect the AJ1 in University Blue and White to get the full Off-White AJ1 Retro High collection

### Average Joe

- The median retail price of these sneakers is \$220 and the median resale is \$370.
- Sneakers without the designer label are far less expensive.

# Any questions?

## My questions:

- How many of each sneaker was originally released?
- How will sales of Yeezy 350s do now that Adidas cut ties with Ye?
- How will Off-White x Nike sneaker sales do since Virgil Abloh's passing?
- What if more brands were included, such as New Balance? What would the most popular sneaker be?
